8yo Amber suffers from a rare & severe neurological disorder, Charcot Marie Tooth disease, which affects her nerves & muscles. She has endured much pain & suffering in her short life, including a family member touched by cancer

8yo Kaya was diagnosed with Duchenne Muscular Dystrophy at the age of five. This is an extremely powerful, debilitating & degenerative muscle disorder. There is no known cure & sufferers rarely survive past their twenties.

Both these beautiful children have loving & supportive families but need our help. All money raised will be donated to these children to assist them with their ongoing medical expenses & to live a happy & fulfilling life.

more details are available on our website
